## PROJECTS

**Bank Telemarketing Success Prediction** ↗ | Machine Learning ,Python 09 2024

- Predict the success of **Binary Classification** Problem.(0 and 1)
- Implemented and compared three models: **Logistic Regression, Naïve Bayes, and XGBoost.**
- Hyperparameter Tuning with **.GridSearchCV.**
- XGBoost achieved **Kaggle score: 0.71286**

**Bot-IoT Intrusion Detection using XGBoost** ↗ | Python, Scikit-learn, XGBoost, SHAP 2026

- Developed an intrusion detection model on the Bot-IoT dataset for binary attack classification.
- Performed preprocessing including mixed datatype handling, label encoding, feature scaling, and **SMOTE** for class imbalance.
- Optimized XGBoost using **Randomized Search** and **Bayesian Optimization** for improved performance.
- Evaluated using ROC-AUC, precision, recall, and confusion matrix; compared with baseline models.
- Enhanced interpretability using **feature importance** and **SHAP analysis.**

## TECHNICAL SKILLS

**Languages:** Python, Java, C, C++, JavaScript

**Developer Tools:** VS Code, Jupyter Notebook, Google Colab,Kaggle

**Technologies/Frameworks:**Linux, Scikit-learn, Pandas, Numpy, Matplotlib, Seaborn ,Bootstrap
